

DESCRIZIONE - DESCRIPTION

Testa termostatica con sensore a liquido
Thermostatic head with liquid sensor

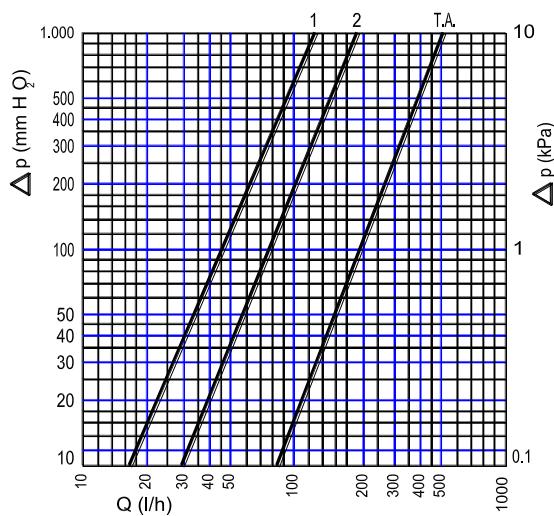

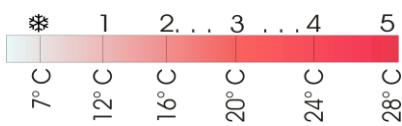

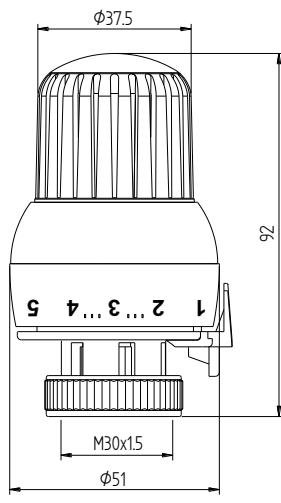

Tête thermostatique avec capteur liquide
Thermostatische Heizkörperventile

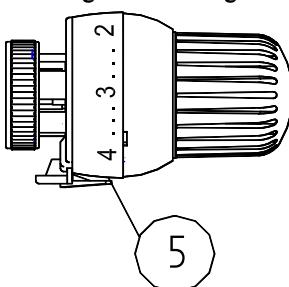

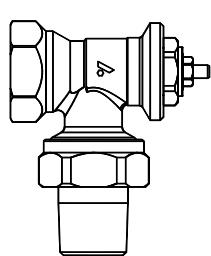

P. Max 10 bar Carico lavoro 80 N
 T. Max 110°C Power force value 80 N

DIMENSIONI PRINCIPALI - LEADING DIMENSIONS- PRINCIPALES DIMENSIONS

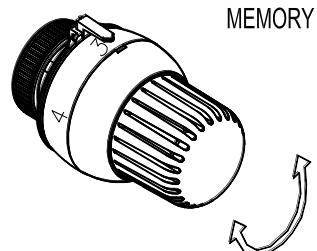

Montaggio - Assembling - Assemblage - Montage

Durante l'estate è consigliabile regolare la testa in posizione tutto aperto (5).

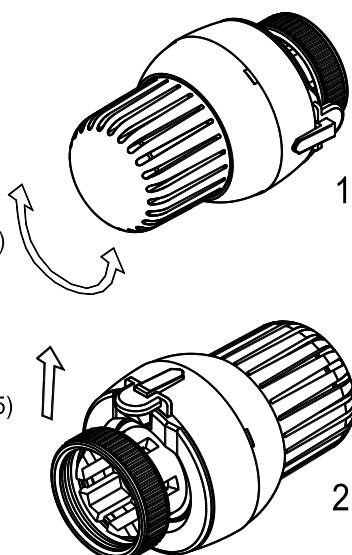

During summer time it is advisable to set the thermostatic head to completely open (position 5).

A l'arrêt de la saison de chauffage, il est conseillé de ouvrir la tête thermostatique (position 5).

Während des Sommers dagegen empfiehlt sich die Stellung 5 mit voll geöffnetem Ventil.

MEMORY

- selezionare la Temperatura ideale (1-5)
- ruotare l'anello fino a far coincidere gli indicatori
- set the right Temperature (1-5)
- turn the upper ring till the pointer are on the same position
- choisir la température souhaitée (1-5)
- tourner la bague jusqu'à ce que les deux indicateurs soient alignés
- Die ideale Temperatur bestätigen
- Den Ring drehen um die 2 Zeiger aufzustellen

**Blocco della temperatura
Temperature Locking
Blocage de la température
Temperaturbegrenzer**

- selezionare la posizione ideale (es.3)
- trascinare verso l'esterno il fermo
- set the right position (i.e. 3)
- move the locking device towards the external
- choisir la température souhaitée (1-5)
- Pousser le dispositif de blocage vers l'extérieur
- Die ideale Position bestätigen
- Den Halter nach aussen ziehen
